printed with the label

Please use original accessories
from Weller® only!

Dear customers,

recently we have become aware of counterfeit Weller® soldering tips appearing in the market place, particularly LT and XT series tips. These tips are of an inferior quality and have no connection to Weller®!

Lack of process control, incorrect dimensions and use of substandard materials in the manufacture of the counterfeit tips will reduce the working life of your soldering irons by damaging the heating elements and because of poor thermal conductivity, selected tip working temperatures will not be achieved.

Visually there is little difference between the counterfeit tips and Weller® originals but there is significant difference in the tip packaging. Weller® original tips are supplied in individual bags. The bag itself is printed with the tip identity information. The counterfeit tip is supplied in a bag with the same identity information on a label stuck onto the bag.

Be aware that warranties will only be honoured if original Weller® parts are used. Your best form of protection is to purchase original Weller® tips from a tried and trusted distributor.

Because only the originals secure your warranty!

If you have further questions do not hesitate to contact us.

Best regards,

your Weller® Team
